\* Maternal and Child Health Management caseload percentages are tabulated monthly from Cornerstone via an active participant report by location code, denoting C/U client or County client. Individual service data are compiled as a total and the caseload percentages are used to extrapolate data to C/U service numbers and County service numbers.

\*\* These data estimated and based on a 10 day monthly service study. The data is reported based on 20 working days in the month.

\*\*\* The process for collecting and reporting this data changed during this quarter.

Outcome data is available as provided by the State through the Cornerstone software program
