Champaign-Urbana Public Health District

Public Health to Change its “Health Check” Schedule

**Monthly Clinics Will be Discontinued in Mahomet, Tolono and St. Joseph
Special Clinics Will Be Offered in These Communities During the Flu Season**

The Champaign-Urbana Public Health District is changing its “Health Check” schedule, offering blood pressure, blood sugar and cholesterol screenings every Monday at its Rantoul office and every day at its Urbana site, while discontinuing the monthly clinics in St. Joseph, Mahomet and Tolono. Instead of offering the monthly health check clinics in these communities, Public Health will schedule special clinics at these sites during the flu season, when demand for the services is high.

Public Health will also offer the same services on all of its mobile clinics in Champaign-Urbana.

Beginning in July, blood pressure, cholesterol and blood sugar screenings will be available every week day at the Health District satellite building at 217 N. Broadway in Urbana. These services will be available from 8 a.m. to noon and 1-4 p.m. For more information, call (217) 239-7827.

Blood pressure, cholesterol and blood sugar tests will also be available every Monday from 1-4 p.m. at the Health District satellite office at the Community Service Center of Northern Champaign County, 520 E. Wabash in Rantoul. Pregnancy tests, testing and treatment for sexually transmitted diseases and adult immunizations will also be available at these clinics.

The Health District’s Wellness on Wheels also offers an array of services on its mobile health units. Services include: blood pressure, blood sugar and cholesterol screenings, pregnancy tests, anonymous and confidential HIV tests, tests for sexually transmitted diseases, risk reduction and health education counseling, risk reduction supplies, tuberculosis tests and referrals to community resources.

Flu and pneumonia shots will also be available in the flu season. For more information about Public Health’s mobile services, call (217) 239-7827 or visit the CUPHD website:
