

Champaign-Urbana Public Health District

COVID VACCINE BOOSTER SHOT

The CDC recommends the following groups **should** receive a booster shot:

- People 65 years or older
- Residents of long term care facilities
- People 50-64 years old with underlying health conditions

The CDC recommends the following groups **may** receive a booster shot, based on their individual benefits and risks:

- People aged 18-49 with underlying health conditions
- People aged 18-64 years at increased risk for COVID-19 exposure and transmission because of occupational or institutional setting

To receive a booster shot, you must meet the prior qualifications and:

- Be 18 years or older
- Have received 2 previous doses of the Pfizer-BioNTech
- Have received your **second** Pfizer-BioNTech dose **at least** six months ago
