

WEARING A MASK AFTER A VACCINE

QUESTION

Do I need to wear a mask and avoid close contact with others if I have gotten the vaccine (full doses)?

ANSWER

YES!

Not enough information is currently available to say if or when CDC will stop recommending that people wear masks and avoid close contact with others to help prevent the spread of the virus that causes COVID-19.

While experts learn more about the protection that COVID-19 vaccines provide under real-life conditions, it will be important for everyone to continue using all the tools available to help stop this pandemic.

To protect yourself and others, follow these recommendations:

Wear a mask over your nose & mouth.

Stay at least 6 feet away from others.

Avoid crowds.

Avoid poorly ventilated spaces.

Wash your hands often.
