

Time as a Public Health Control (TPHC)

Applicant Name _____ Permit # _____

Establishment Name _____

Address _____

E-mail _____ Fax _____

Work Phone _____ Cell Phone _____

The Illinois Food Code, Section 3-501.19, states that time only, rather than time in conjunction with food temperature, can be used as a public health control for a working supply of TCS (time-temperature control for safety) food or for ready-to-eat TCS food that is displayed or held for service.

Reason(s) for using time alone as a control (i.e., why can you not use temperature as a control?):

Proposed Procedure:

Requirement:

Identify specific locations the above listed foods will be held while utilizing time only as a public health control.

Proposed Procedure:

Requirement:

Identify the point at which time only as a public health control will begin for each identified food.

Proposed Procedure:

Requirement:

Indicate the manner in which the time limit will be marked for each identified food (maximum four hours or six hours).

Proposed Procedure:

Time as a Public Health Control FAQ's

Using time only as a public health control allows food to be sold without temperature control for up to four (4) hours or six (6) hours (Food Code 3-501.18). The food must be properly cooked and/or cooled before being able to use time as a control.

What do I need to be able to use time as a public health control?

To be able to use time as a public health control, you will need to complete both sides of the “Time as a Public Health Control” form and submit it to the Champaign-Urbana Public Health District/Champaign County Public Health Department. After submission of the form, it will be reviewed and your inspector will contact you about the circumstances of using time as a public health control.

When can time as a public health control be used?

Time as a public health control can be used for the following:

- A working supply of TCS (time-temperature control for safety) food before cooking & service.
- Ready-to-eat, TCS food that is displayed or held for sale or service (i.e., pizza slices displayed for sale).
- With prior CUPHD/CCPHD approval as indicated on the attached form.

When must food be discarded?

After four (4) hours or six (6) hours from the initial removal from temperature control, food shall be discarded. No food may be reused.

Food must also be discarded if:

- It is displayed/held in unmarked containers or packages.
- It is improperly marked.

What if I have more questions?

Contact the Environmental Health Division at the number listed below.
